Please reject the NAB's petition 04-160. As paying consumer to satellite radio I have chosen to listen to commercial free radio. I do not believe that my choice should limit my right to the programming offered. To not allow certain programming on this format such as traffic and weather is absurd, NAB should not dictate what I can hear or for that matter it may be dangerous if they do. If this format is all I have available why should I be not allowed the most current weather. I will be watching the FCC rulings. Thanks, MHolsen
